

## YOUR CHALLENGE

Create your own maze

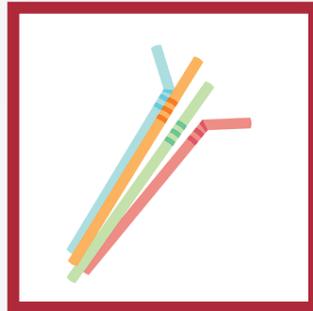

## STEP 1

## Gather Your Materials

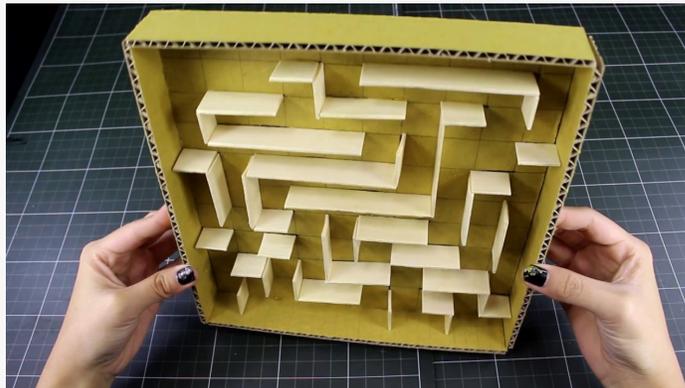

OR

## STEP 2

## Design your maze

1. Using a marker, design the layout of your maze inside the shoe box. Try and make it as difficult as possible to get around but remember you need a starting point and a finish!
2. Once you have your maze designed you can build your walls with cardboard or straws.
3. Challenge your parents or siblings to see who can get their marble or ball around the maze the quickest without getting stuck!

Send us a picture of your project
